Titebond THE PRO'S ADVANTAGE

INSTANT BOND

Titebond Instant Bond is a high-performance, one- or two-part adhesive system that offers extremely fast set times and initial cure. They provide strong, impact-resistant, and permanent bonds to wood, metals, plastics, and so much more. Ideal for hard to reach joints or surface areas that are difficult to clamp, Instant Bond Adhesives play an essential role in professional woodworking, home repairs, and craft projects.

IMMEDIATE. PROFESSIONAL. RESULTS.

ADHESIVES

Think Fast! When you demand immediate, professional results, Instant Bond is the answer. Our pure, high-quality cyanoacrylate adhesives are available in four viscosities, depending on your application or required MIL specification. Specifically designed to deliver superior and consistent performance on wood, these adhesives also offer excellent adhesion to most common materials.

Adheres To

- Wood
- Leather
- Stainless Steel
- MDF
- Brass
- Fiberglass
- Acrylic
- PVC
- Polystyrene
- Ceramic
- Polyester
- Aluminum
- Porcelain
- Granite
- Natural Rubber
- Chrome
- Nylon
- Gemstones

Ideal For

- Hairline cracks
- Chair repair (leg, spindle, etc.)
- Small defect repair
- Soak end grain—Prevent splitting
- Pen making
- Wood finish/protectant
- Models and crafts
- Granite countertop installation
- Wood knots and voids
- Porous and odd-shaped surfaces
- Finish carpentry
- Assembly of jigs and fixtures
- Molding and trim
- Gluing turning blocks to scrap
- Decorative inlays
- Miter joints (crown molding)

ACCELERATORS

Think Even Faster! Our easy-to-use, heptane-based Accelerator and Activator are formulated for use with any Instant Bond Adhesive. They neutralize the acidity in wood for stronger, more consistent bonds and are perfect for highly porous materials and low humidity conditions. The Accelerator and Activator are both ideal for pre-assembly and post-assembly applications.

User Tips

- Handle product carefully and read label cautions
- Protect eyes, hands, and work areas
- Ensure adequate ventilation during application
- Store in cool, dry place to optimize shelf life
- Apply adhesive in temperatures above 50°F
- Handling and set times may be affected by materials and environmental conditions
- For more complex projects, ensure that all pieces are ready for assembly
- To fill larger cracks, we recommend using layers of adhesive & accelerator
- For adhesive cleanup, use acetone. Follow solvent vendor's precautions
- After use, wipe nozzle with dry cloth & replace cap
